Sasaram, Bihar | +91 7481938515 | rajnishk748193@gmail.com | [LinkedIn](#)

## OBJECTIVE

---

Motivated B.Tech Computer Science student with strong foundations in Java backend development, Spring ecosystem, and REST API design. Experienced in building scalable backend systems and passionate about high-performance, distributed architectures. Seeking opportunities to apply my technical skills in a growth-oriented engineering team while expanding expertise in microservices and cloud-native development.

## EDUCATION

---

### PW Institute of Innovation, Noida

2025 – Present

B.Tech in Computer Science Engineering | 1st Year

### Chhatrapati Shahu Ji Maharaj Govt. Polytechnic, Ambedkarnagar, U.P.

2021 – 2024

Diploma in Computer Science Engineering | CGPA: 7.0

## TECHNICAL SKILLS

---

- **Programming Language:** Java, Core Java, OOP, Collections Framework, HTML, CSS, Basic JavaScript
- **Frameworks:** Spring Core, Spring MVC, Spring Boot, Spring Security, Spring Data JPA
- **Backend & Tools:** REST API Design & Development, Maven, Hibernate / ORM
- **Databases:** MySQL, PostgreSQL
- **Dev Tools:** Postman, Git, GitHub
- **Emerging / Learning:** Microservices (in progress), Apache Kafka (in progress), Vector DB, RAG (planned)

## PROJECTS

---

### Payment Gateway Integration System | [Under Development](#)

Spring Boot • Spring MVC • Spring Security • REST API • PostgreSQL • Hibernate / JPA • Postman

- Built a backend system using Spring Boot and REST APIs to record and manage simulated payment transactions, including endpoints for creating, viewing, and updating transaction status.
- Designed the database schema in PostgreSQL using Hibernate/JPA with proper relational mapping for transaction and user data.
- Tested all API endpoints using Postman to verify request/response correctness and handle edge cases such as invalid input and duplicate requests.

**Roadmap:** Currently extending to a microservices-based architecture with Apache Kafka for async event handling. Target throughput: 10,000 transactions/sec. Future phases include design pattern implementation, RAG integration, and Vector DB support.

## CERTIFICATIONS & ACHIEVEMENTS

---

- Hackathon Participant – RIFT Hackathon, organized by PW Institute of Innovation, Noida

## LANGUAGES

---

- English – Basic / Working Proficiency
- Hindi – Native / Fluent
